The Rover V8 engine might have started life in the USA, but thanks to some creative thinking at Rover, it became a British institution, powering some of the country's most iconic cars... The Rover V8 engine had a very interesting life. During the late 1950s, the US car industry turned to aluminium as a material to build their engines from. The reasons for this have been well documented, but ...

Rover V8 engine - the whole story from 1963 to 1999

These figures are notably improved on the V8 diesel. The same two engines will be added to the full-size Range Rover, with the 0-62mph of the D350 rising to 7.1sec and CO2 emissions up to 225g/km ...
