applications, architectures and tools that support the business processes associated with trading energy commodities (Crude oil, Refined products, Natural Gas, NGLs, Electric Power and so on). In the broadest sense, commodity trading means both the buying and selling of energy commodities, the movement and delivery of those energy commodities and associated risk management activities.

What is ETRM Software? - Energy Trade Risk Management

Because energy markets are unpredictable, energy risk management is a necessary component of your energy procurement toolbox. Chaos theory is a better guide for buying energy than forecasting attempts. Expect the unexpected to happen. If you fix your price, markets could fall and you could lose competitiveness.
